DVE GLAVE

Druga glava udvostručuje broj igala za vrlo visok stepen ubrizgavanja ili povećava satni kapacitet većim pomakom. Alternativno se iza glave za ubrizgavanje može koristiti glava za omekšavanje mesa.

DOUBLE HEAD

With a second injection head the customer can double the quantity of needles in order to inject products with very high production rates or the increase the capacity per hour with a bigger advance. Another possibility is the use of a tenderizing head after the injection head.
